

# Agenda - 11/7

## Run through quick summary of TourneyTrack

- Discuss our motivation for creating the system
  - Discuss the shortcomings of existing solutions (dorm, IM)
- Describe simple scenario of use case of our system
  - Refine purposes
  - Discuss our context diagram

## Discuss Data Model and Concepts

- Show our data model diagram
  - Describe and get feedback on our solution for Round Robin vs Elimination
    - Match dependencies
    - Generalization of the different tournament types
  - Discuss possibility of implementing only Elimination for MVP
- Discuss how our concepts play into the data model
  - Ask if there is any more concepts that we should include to enrich our system
- Talk about auto-match generation idea, and complications with this in regards to setting up the dates of matches.
  - Should we even record dates? Allow admins to manually enter?

## Discuss upcoming challenges

- Talk about using MIT Certificates and ask for advice in using them
- Ask about what is expected for Security Concerns part of design
- Ask about what is a good subset of features to include for the MVP
