

# Agenda - 11/21

## Demo MVP

- Show account, tournament, team, and bracket creation
- Show match outcome reporting system
- Discuss things that need to be done (stats, search, user experience, etc)
- Discuss things that need to be changed
- Feedback on progress so far and our plan for next phase

## Discuss Changes that need to be made to Design Doc

- Concepts
  - Discuss feedback, what should the focus of the concept descriptions be?
  - Example of a good concept description
    - Show / critique updated bracket description
- Security
  - Example of a strong mitigation discussion
  - Should the performance / data security points just be removed?
- Data Model, Design Challenges, API spec
  - Is API spec necessary in next phases?
- Data Design
  - Is this parallel to how our schemas are implemented?

## Future Decisions

- Should a player be able to compete in multiple teams of same tourney?
- How to support statistics
- Should we have tournament search? Search anything else?
- Should we support double elimination?
