Progress Report - 11/14

Completed

- Created our design doc
- Created our teamwork plan
- Ironed out confusions about app scope and data model
  - Decided that app will be scoped to the informal-tournament level, and that we will be serving members of the MIT community. See Design Challenge 1 for details on this decision
  - Updated the data model to clarify parent-match relations
- Created a draft of the API spec
- Created the schemas for our data models
  - https://docs.google.com/document/d/19n6SgwV62Ckr8Sd9w_pS4yXlnboDK-7Sa4-IUHEchqs/edit?usp=sharing
- Implemented email verification for user account creation

Todo

- Iron out and formalize the API spec
  - Specify routes and the expected results of each route
- Complete the implementation of the server api
- Create views for the client side of the app
- Create unit tests for server-side code
